

CANRIG DRILLING TECHNOLOGY LTD

PRODUCT BULLETIN NUMBER: 18

DATE: June 29, 1993

SUBJECT: Pipe Handler Wireline Maintenance

SERIAL NUMBERS: 006

DISCUSSION: Proper inspection of all components is essential for efficient and safe operation of the Pipe Handler.

RECOMMENDATION:

1. Inspect the cable daily for breakage or fraying.
2. Keep the wireline clean and well lubricated. A lubricant containing molybdenum disulfide is recommended.
3. Inspect the attachment hardware at each end of the wireline looking for signs of wear.
4. Avoid loading of slack line and shock loads.
