Steel Cable Tugger Line to Replace Cat Line Tugger During Top Drive Rig Up				

BACKGROUND INFORMATION:

The rig up procedure in the TESCO Top Drive User Installation Guides includes a note to make use of a "cat line tugger" with rope to assist with installing the Top Drive. Top Drive rentals recently had a technician get hurt from using a cat line tugger that broke and dropped a torque bushing on the technician. Therefore Top Drive rentals is mandating that no cat line tuggers with rope be used when installing Top Drives on any rig; instead, they are to be replaced with a tugger line that uses a steel cable. References to cat line tugger on all Top Drive User Installation Guides need to be changed to suggest the use of a "tugger line".

AFFECTED PRODUCTS:

All TESCO Top Drives. The change is documented and implemented in all TESCO Top Drive User Installation Guides as per ECN-097-0214.

ACTION REQUIRED:

All TESCO Top Drives that are operating in the field or are in the process of being rigged up must replace the cat line tugger with a steel cable tugger line.

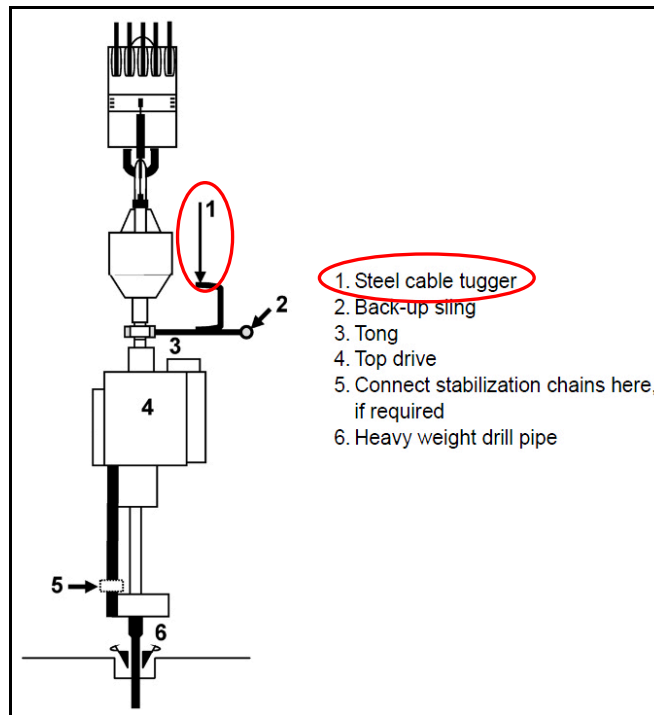

Figure 1: Using a steel cable tugger line in place of cat line tugger
